1. The drawings are objected to because certain box-type drawing elements do not have proper descriptive labelling per 37 CFR 1.84(o). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawing elements that require descriptive labelling are elements KE (Fig. 1), AE (Fig. 1), TG (Fig. 1), and SE (Fig. 2). The labelling may be either words describing what is illustrated by the box-type drawing element or an internationally-accepted schematic symbol that identifies what is illustrated by the box-type drawing element. Correction is hereby **required**.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Throughout claims 1-15, each and every use of “branch” or “branches” is indefinite and unclear in context.

On line 2 of independent claim 1, it is unclear in context what is meant by “remote signal branches of antenna systems.”

On lines 1-2 of claim 1, it is unclear in context what is meant by “spatially remote” in that the language on lines 1-2 does not make clear what is “remote” from what.

On line 3 of claim 1, it is unclear in context what is meant by the phrase “generating a base signal by means of a timer,” in that it is not clear how a “timer” would generate a “base signal.”

Dependent claims 2-15 are unclear in that they depend from unclear independent claim 1.

4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. Claims 2-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest for showing the state of the related prior art. Please especially note Wu ('155), which has a time base generator as item 34 in Figure 5.
